**Gordana Petkovska** is a Nurse Practitioner in the Advanced Wound Assessment Service in Silver Chain Group (WA) specialising in the treatment of chronic non-healing wounds and complex ostomies. She is a Stomal Therapist having completed the AASTN Stomal Therapy course prior to completing a postgraduate diploma in Domiciliary Nursing and Masters in Nursing (Nurse Practitioner). Gordana clinical practice has primarily been in wounds and ostomies in the community setting. As Clinical Nurse Consultant Manager with Silver Chain, she lead the team servicing the Northern Perth corridor managing over 1,000 community clients predominately with wounds both acute and chronic. Gordana returned to a clinical role as Nurse Practitioner for the eastern region after being endorsed two years ago.

---

**Joseph Frenkel** runs a private Podiatry and Wound Care practice in inner Melbourne. He has a Bachelor of Podiatry from La Trobe University, a Master of Science in Wound Healing from Cardiff University and holds academic positions in both universities. In addition to his clinical and academic work, Joseph has regular speaking engagements across number of settings, as well as providing mentoring of graduate Podiatrists and pretending to still be good at basketball.

**Anne Harbison** is a RN, RM and GradCert Cancer Nursing with experience of midwifery, cancer and palliative care and research nursing in inpatient and community settings in Australia, UK and India. I have most experience in the management of cancer and radiotherapy wounds and venous ulcers, in the community. I hope to bring a generalist, holistic perspective to the Wounds Australia Membership pillar.

---

**Louise Webber** has a Masters in Nursing Science (Nurse Practitioner) and is the owner of Wound Therapies – providing wound consultancy services on the Sunshine Coast and Metro North Brisbane. She has worked across a number of public hospitals and Community Nurse Settings both in Australia and overseas and has previously held an Honorary Clinical Fellowship with the Australian Catholic University. Her experience in the commercial field in Wound Care has given opportunity to understand the importance in the relationship between the wound care industry and its benefits to the health care sector. Louise is also currently part of the Venous Leg ulcer guidelines working party and is chair of the Implementation group. She also is co-director of a Wound Education Practice providing interactive workshops on all aspects of wound management to clinicians.

**Lee McLean** is a Community Endorsed Enrolled Nurse for St John of God Health Choices Geelong She has a passion for wounds and has done almost every course that is available to a EEN Nurse. Lee has been a member of AWMA now Wounds Australia for 8 years. She devours wound care books like novels always researching on new techniques to help her clients. Always talks about Wounds Australia to colleagues about the benefits in joining. She would like to try and get organisations to realise that Endorsed Enrolled Nurses do get involved in wound care of all types and they need to be allowed to enrol in courses that currently not available to them.

**Kim Kaim** has a Master's degree in wound care from Monash and is currently the Clinical Nurse Consultant Wound Management for St Vincent Private Hospital Toowoomba. Kim is also an active member of Wounds Australia at both the State and National levels and chaired the 2015 Queensland State conference. Kim spent several years working rurally and has a passion for supporting rural health professionals with understanding modern wound care principles and translating evidence into practice. As a hobby, Kim also designs web applications and mobile apps supporting wound management.

**Kerry May** is the Director Acute Allied Health Monash Health. Previous to this Kerry was the Podiatry Manager and Diabetic Foot Unit Coordinator at the Royal Melbourne Hospital for over 10 years. Kerry has a Bachelor of Podiatry, a Graduate Diploma in Vocational Education and Training, a Master of Gerontology and an Executive MBA. Her role at RMH involved establishing a Diabetic Foot Unit with A/Prof Paul Wraight to ensure that people with diabetes related foot complications were provided with evidenced based management by a multi-disciplinary team passionate about limb preservation and patient quality of life, across the continuum of care. Kerry has represented Allied Health on the Australian Wound Management Association, was a founding and current committee member of the Advanced Practising Podiatrist – High Risk Foot Group, and is privileged to be part of the inaugural Board of Wounds Australia. Kerry has a keen interest in, and commitment to, lifelong learning.

**Linda Cloete** is a lecturer at Avondale College of Higher Education in Australia. She trained as a nurse at the University of Witwatersrand in Johannesburg South Africa. After spending a few years working as a midwife she completed her Masters also at the University of the Witwatersrand which took her into part time teaching as well as rotating through neonatal and cardiac ICU. Since 2006 it was here that she developed a long term interest in wound care.

Linda has been living and working in Australia, maintaining clinical skills in the surgical environment while lecturing. She is currently completing a PhD specializing in the lifestyle management of Type 2 Diabetes Mellitus.
